The role will cover projects from conception through to delivery on site, so there is likely to be a requirement to support/monitor the work and to undertake environmental inspections and audits at construction sites, or to support others undertaking these tasks.

The candidate must:

1. Be able to develop, review, update and implement Environmental procedures and plans as per the requirement of the project.
2. Be able to Present innovative solution to environmental issues.
3. Collect data and analyze environmental aspects and impacts associated with project activities and be able to offer practical solution.
4. Guide Management as how to efficiently minimize generation of waste and the cost-effective means of disposing it off.
5. Be well versed with local and international environmental laws and regulations.
6. Make recommendations to maintain and improve environmental performance.
7. Be responsible for providing technical help and support for eradicating various environmental problems.
8. Understand environmental audits and must be able to generate report independently.
9. Possess the ability to effectively prepare investigation reports and suggest corrective actions.
10. Be able to establish and maintain communication channels with stakeholder for their environmental concerns

Requirements for Social Specialist:

Experience: 08 + Years professional experience conducting social domains

Education: Bachelor's / Master's degree in Social/ equivalent

Social Specialist

Develop, implement and maintain a consistent strategy on stakeholder's engagement establishing cordial relationship with host communities and other relevant stakeholders.

The candidate must:

1. Know to organize regular engagements in Project Affected Communities and how to collect concerns and questions raised by local stakeholders.
2. Be able to establish close communication with stakeholders to collect input of their concerns.
3. Possess understanding of District, Ward, Village and Hamlet level stakeholder and how they may be affected by work activities
4. Be able to assist environmental, social teams and others during field visits and develop consultation process with communities, local governments and other legislative bodies.
5. Possess the abilities to explain and convince local communities about the benefits arising from the project both short term and long-term benefits.
6. Possess understanding of construction activities at various locations along with the type of community engagement required
7. Be able to develop and Implement stakeholder engagement activity plan for each community.
8. Possess deep understanding of grievance management system in context with local and Client's requirement.
9. Keep the management updated on community issues and their grievances.
10. Record and report community concerns and project related grievances to prepare and deliver prompt response.
11. Maintain comprehensive records of stakeholder engagement process related information such as minutes of meetings, Written and visual evidences, Attendance sheets and disseminate the same to client.
12. Generate daily, weekly and monthly stakeholder engagement reports to keep all relevant authorities updated

Interested individuals with the capacity and willingness to work with CPP in the position mentioned above at EACOP should send application and CV to CPP Human Resource Office through e-mail wangxueqi@cpptz.com on or before 17:00 hours East African Time (EAT), on 12th January, 2023. Subject of the email should be CPP-PROC-TZ-20221222_Job Application for Environmental/ Social Specialist - NAME.
